### Expanded Payment Options

Velocity for Mass Transit enables organizations to expand payment options for their riders while reducing operating costs. Velocity provides a full range of payment mechanisms including Point-of-Sale, Gateway, Web and Over-the-Phone to streamline the revenue cycle. Payment data can be seamlessly integrated into your existing systems to reduce manual efforts & improve reconciliation. All Velocity products can process credit card, branded debit card, and ACH/e-check transactions.

### Simple and Flexible Integration

Velocity's payment solutions are designed to make it simple for you to integrate your front and back end systems into a state-of-the-art payment processing system. Velocity offers both single transaction and batch processing options, giving you the flexibility to select the option that best meets your needs. Velocity supports one-time payments, as well as recurring and automatic payments. This gives you the ability to support both casual riders and repeat riders looking to replenish their fare cards automatically. Velocity will respond in real time with the results of each transaction, allowing you to quickly update your systems, enabling your riders to continue with their trip.

### Compliant and Secure

Velocity for Mass Transit is fully compliant with the best practices of both PCI and SSAE 16 Type II. Velocity takes data security very seriously, ensuring that all transactions are fully encrypted and processed in a secure manner. With Velocity, we manage payment processing so you can focus on transporting your riders to their destination.
