Payment Solutions for Government

Expanding payment options for citizens and streamlining revenue collections are essential for today's modern government organization. Velocity for Government enables organizations to offer electronic payment options to citizens while reducing operating costs and service fees. Governments need a comprehensive, enterprise-wide solution that manages and controls electronic payments while satisfying citizen demand for the highest levels of service.

With Velocity, organizations can shorten the revenue cycle, expand government services and lower transaction costs.

Enterprise Solutions

Velocity for government provides secure and easy-to-use solutions to optimize revenue collections. Standard practices and innovative technology allow municipalities across the country to provide their citizens greater convenience and service. With cross-department management and control of e-payments, governments reduce operating costs and improve reporting and forecasting.

Velocity allows organizations to standardize payment acceptance across all departments while meeting the unique business and data integration needs of each department's operations.

Lower Costs, Expanded Services

Velocity can reduce transaction fees and expand citizen access to government services through 24-hour payment self-service and electronic bill presentment. Velocity is a secure, modular and configurable tool for essential revenue.
